

Mukuba Overview

Mukuba Resources Limited is an African focused base metal exploration company with assets in Zambia. The company is focused on the exploration and development of the Northcore Project, which is located in the highly prospective Central African Copperbelt region of Central Zambia. The Northcore Project encompasses approximately 2,274 square km of geologically prospective ground in the Domes region of the Zambian Copperbelt and is licensed for copper. Geological mapping, soil sampling and investigation of the historical showing as well as ground-truthing of the geological surveying results have confirmed the historical geological anomalies, and identified new anomalies. The Company's 2009 exploration program included drilling several of these anomalies. The Company is currently engaged in a 2010 drilling program which is anticipated to be completed by November 2010.

Mukuba is led by a dynamic management team that combines technical excellence with several years of operating experience throughout Africa. Mukuba Resources is a Canadian public company with shares listed on the TSX Venture Exchange since February 2010.
